#### **DETAILED ACTION**

### Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 43-65,77-86 and 95-102 are rejected under 35 U.S.C. 102(b) as being anticipated by Smith et al. (U.S. Patent 4914514).

Smith et al. discloses: Regarding Claim(s) 43-65, a method of constructing a screen comprising: wrapping a wire substantially helically about a screen body as the screen body rotates and at least one of the wire and screen body is translated substantially parallel to a screen body longitudinal axis; measuring, automatically (using VCR and hair generator 30), a dimension between adjacent wraps of the wire on the screen body continuously during one or more intervals while wrapping the wire about the screen body; and adjusting the wrapping of the wire about the screen body to affect the dimension between adjacent wraps of wire on the screen body in relation to the measured dimension between adjacent wraps of the wire on the screen body (Figs. 1-4, col. 3, line 46-col.5, line 11); Regarding Claim(s) 77-86, a method of constructing a screen, comprising: wrapping a wire substantially helically about a screen body measuring at least one of a dimension between adjacent wraps of wire about the screen body and a dimension of the wrap wire; and marking (with hair generator 30) the screen while wrapping the wire about the screen body in relation to the measured dimension (Figs. 1-4, col. 3, line 46-

Application/Control Number: 10/733,614

Art Unit: 3726

col.5, line 11); and Regarding Claim(s) 95-102, a method of constructing a screen, comprising: wrapping a wire substantially helically about a screen body; and measuring, automatically (using VCR and hair generator 30), at least one of a dimension between adjacent wraps of wire about the screen body and a dimension of the wrap wire while the wire is being wrapped substantially helically about the screen body (Figs. 1-4, col. 3, line 46-col.5, line 11).

## Response to Arguments

Applicant's arguments with respect to claims 43-65,77-88,95-102 have been considered but are most in view of the new ground(s) of rejection. See the new Office action.

#### Conclusion

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
